

OLQ13

Study Guide

OLQ13 is over C++. You will find it very helpful to complete Homework 7 before taking this quiz.

You will be asked to READ C++ code but not write it.

Questions will cover the following C++ topics

Command Line Parameters

Default Arguments

`cin` and `cout`

insertion and extraction from streams

`<<` and `>>`

which one does what?

`endl`

pass by reference

`const`

streams – detecting the state of a stream

stream manipulator

sticky vs non sticky

hex vs oct vs dec

`vector`

`erase()`

`begin()`

`using namespace std;`

when this line is in a program, you can write just `cin` and `cout` and not `std::cin` and `std::cout`

given a class in C++, can you write it in Java?
