

OLQ7

Study Guide

OLQ7 will cover concepts from Coding Assignment 2 and class diagrams.

1. Be able to use `charAt()`
2. Be able to use `substring()`
3. Be able to use the different versions of `indexOf()`
4. Use command line arguments
5. Concepts from Coding Assignment 2
6. Given a class diagram, create the class. Several examples were shown in lecture. Be sure to not make assumptions and add code that is not specified by the class diagram. Formatting rules apply to the code produced to represent the class. Spelling matters and case matters.
7. ASCII values ('A' is 65, 'a' is 97, zero is 48 and blank is 32)
8. Sorting `ArrayLists` and writing out to a file
